

Kodak Scan Station 500 vs. Fujitsu fi-6010N Network Scanner

Kodak Scan Station 500

Fujitsu fi-6010N Network Scanner

Top 5 Reasons to Select Kodak

1. Proven throughput speed

- The Kodak Scan Station 500 is 50% faster in 200 dpi color duplex!

2. Scan to multiple destinations simultaneously!

- Send to e-mail, printer, fax, FTP and portable USB drive, all with a single scan!

3. Designed for exceptional document handling

- Kodak's robust paper transport system (including four feed rollers) virtually eliminates misfeeds and rescans
- Easily handles batches with a mix of document types and sizes
- Embossed cards are no problem
- ADF holds up to 75 pages (20 lb. paper)
- Securely scans over 1,500 pages a day

4. "Voice Attachment" feature, a Kodak exclusive

- Send audio messages with personalized comments or instructions along with your scanned images

5. Optional accessories support the way you do business

- Kodak A3 and A4 Flatbed Accessories available

Top 5 Reasons **NOT** to Choose Fujitsu

1. Compare actual scanning throughput speed

Scanner	Claimed Speed	Actual Speed (200 dpi color duplex)
Kodak Scan Station 500	30 pages per minute	30.3 pages per minute*
Fujitsu fi-6010N Network Scanner	25 pages per minute	20.3 pages per minute*

* Transport speed test settings: 200 dpi, color, duplex, PDF format.

2. Scan and scan again!

- Cannot send to multiple destinations at the same time—must rescan each document for each destination

3. Workload limitations

- Testing shows that Fujitsu's paper transport design (with only one feed roller) delivers inconsistent paper feeding performance
- Must scan embossed cards one at a time
- Glossy business cards often jam
- Mixed-batch scanning requires extra document preparation
- Cannot scan to portable USB drives
- ADF only holds 50 sheets (20 lb. paper)
- Recommended daily use is only 1,000 pages

4. Need to send a message? Start typing!

- No ability to send a voice message attachment

5. Limited options for document feeding

- No A3 or A4 flatbed scanner available

Consider all the advantages Kodak offers against all the Fujitsu limitations and the choice is clear: the **Kodak Scan Station 500.**

The Kodak logo is displayed in a bold, red, sans-serif font. It is positioned in the lower right quadrant of the page, with a large, stylized yellow arrow pointing towards it from the bottom right corner.
